3000 LITRE PLASTIC DUAL SEPTIC TANK

TANK:

A plastic 3000 litre Dual Septic/Settlement tank. These tanks are manufactured using Polyethylene and are moulded using a rotational moulding process which produces a stress-free product. With correct installation and general on-going care, these products have a long lifetime ahead of them with very little or no maintenance required. They are extremely robust and very resilient.

SPECIFICATIONS:

- Capacity: 3000 litres
- All pipe work is 110mm as standard
- 460mm lockable covers (pedestrian loading)
- Centre pipe is supplied loose for connection/installation purposes

DIMENSIONS:

Length: 2770mm
Width: 1260mm
Depth: 1920mm
Weight: 100kg
