

TAN.DIP.V-7500

7500 Litre Plastic Bunded
Diesel Tank Dispenser

Capacity	7500 Litre
Length	3300mm (inc Cabinet)
Width	2570mm
Height	2500mm
Weight	550kg

Information

A 5000 litre plastic bunded diesel tank dispenser which is suitable for commercial applications.

The liquid is stored in the primary or inner tank and the outer tank forms the required bund with capacity for 110% of the primary tank's capacity. This tank is suitable for the storage of Gas Oil & Derv (Red Diesel or White Diesel). A bunded tank is a tank within a tank, as a result, the outer tank provides protection for the inner tank making it harder for the inner tank to fail but in the unlikely event of the inner tank failing, the outer tank will provide secondary containment.

Manufactured in the UK and moulded from Polyethylene using a rotational moulding process consequently, this produces a stress-free product. Furthermore, the Polymer used includes additives which make it resistant to harmful UV rays from the sun and with correct installation and general on-going care, these products have a long life ahead of them with very little or no maintenance required.

Specification

- ✓ 7500 litre (1650 galls) capacity
- ✓ Manway Access on inner tank
- ✓ 2" fill point
- ✓ Overfill prevention
- ✓ Contents gauge (clock gauge)
- ✓ Lockable outer cabinet door
- ✓ Level alarm (battery powered)
- ✓ 230v 60LPM pump
- ✓ Digital flow meter
- ✓ 6m Hose
- ✓ Automatic nozzle
- ✓ Fuel filter

Compliance

This tank complies with: Oil Pollution Prevention Guidelines (England & Wales) 2002 PPG2 and carries CE approval (The CE number is present on the tank). As a result, this tank complies with current environmental standards.
